Inspection Photos

Photo 5. Facing toward the drilled well. The drill cuttings have been removed.

Inspection Photos

Photo 6. Facing west at the corner of the location. Unused areas of the location will need to be recontoured and reclaimed with 6 months of drilling.

Inspection Photos

Photo 7. There are several areas where the silt fence is not maintained. Previous corrective was not completed.

Inspection Photos

Photo 8. Facing toward the soil stock pile. The stock pile will need to be seeded before the growing season unless it will be re-spread for reclamation before that time.

Inspection Photos

Photo 9. Facing east at the corner of the location. Unused areas of the location will need to be recontoured and reclaimed with 6 months of drilling.

Inspection Photos

Photo 10 There are several area where the silt fence is not maintained. Previous corrective action was not completed.
