Re: Colorado Oil and Gas Lease No. 57/1020
#2A State Well, NWSWNW 16-9N-56W, Weld County
Surface Lease S32954, Al and Ethel Mae Miller

Gentlemen:

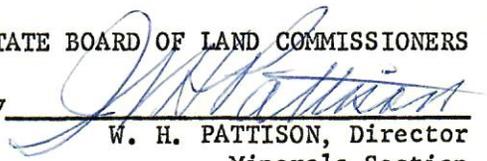

You have a gas well located in the SWNW of the above section on State land. Our surface lessee, Mr. Al Miller, has contacted us concerning problems he is having with the water you are producing from the well. He says that he is unable to use this pasture and has lost several cows as a result of the contaminated water.

You must make some arrangement to take care of the water by suitable ponds or otherwise. Also, the area immediately around the location must be fenced, so that Mr. Miller can get full use of his surface lease.

Please see that some arrangement is made to correct the situation without delay and report to us when the work is done.

Very truly yours,

STATE BOARD OF LAND COMMISSIONERS
