Comment: Inspection doc #712700782 observed rill and gully erosion forming site wide with lacking and inadequate storm water BMPs and required compliance by 6/15/2023. It was observed in this inspection that cut/fill slope tracking in addition to sparsely distributed hydromulch/tackifier has facilitated degradation and continued rill/gully erosion site wide. Original CA has not been addressed. Original CA and date remains applicable. No CA date is being provided as this location is out of compliance for the same Rule.

Corrective Action: **Comply with rule 1002 Install or repair required BMPs.**
