Hey Joseph,

Thank you for fixing the errors and checking on these. After our review of the P&A's, we agree with your listed BMP's as long as they are within the boundaries of agreed upon pre-Form 6 CPW consultation HPH areas.

-Stay Wild,

Hey Lexi,

I reviewed these with the 2024 HPH and I also removed the acronyms. I am not sure why our internal system did not flag those locations in Aquatic Native Species Conservation Waters. I apologize for that. I will get this corrected going forward. Please see the revised list below. Let me know if you have any additional questions.

- Bald Eagle Nest Buffer .25 / .5: KMOG will not conduct operations between 12/1 – 7/31
- Bald Eagle Winter Night Roost: 11/15 – 3/15 operations only between 10am – 2pm. It is our intent to finish any work in BEWNR prior to 11/15
 - For those locations within both .25/ .5 mi Bald Eagle Nest & Bald Eagle Winter Night Roost, the STIP is 11/15 – 7/31
- Aquatic Native Species Conservation Waters: KMOG will implement stormwater BMPs during operations to control flow(s) and manage sedimentation.

Subject: [EXTERNAL] Re: Upcoming Form 4 & 6 Submittals

WARNING - This message is from an EXTERNAL SENDER - be CAUTIOUS, particularly with links and attachments.

Hi Joseph,

I received a request for consultation on the list of P&As that you sent me in January. I have been reviewing these based on Township, Range, Section and missed some of these. I have attached a screenshot including mistakes I have found and am needing you to update your BMPs for these areas. I have also been asked by the OGLA that we always write things out instead of abbreviations (i.e. BEWNR to Bald Eagle Winter Night Roost). I have cc'd Amanda Petzold, the OGLA so she can see our responses.

Here is the next list of upcoming submittals for form 4 & form 6s. Please feel free to take your time, I realize this is a lengthy list. Obviously we won't be starting on any of these locations until 3/16, at the earliest. We have worked hard over the past couple years to try identify our upcoming PAs (Form 6s) that fall with in wildlife timing windows. While, I can't say this is a complete list, this should be the majority of locations we target between 8/1 – 11/14 or 12/1 this year. I will also note, being this far out our rig-on dates could change, however I can attest that work will be scheduled to take place outside the timing limitation windows we are agreeing to below. If, for any reason, our operations were to extend into timing limitation CPW would be notified. Below are the BMPs we will have in place based on the HPH identified.

BE NEST .25 / .5: KMOG will not conduct operations between 12/1 – 7/31

BEWNR: 11/15 – 3/15 operations only between 10am – 2pm. It is our intent to finish any work in BEWNR prior to 11/15
