General Comment:

On 4/12/2024, Reclamation Specialist Trujillo conducted an interim reclamation and stormwater inspection at TEP Rocky Mountain LLC's CSF-67S91W/8SESW Location in Garfield County, Colorado.

The following compliance issues were observed during this inspection:

- Stormwater
- Loadlines missing cap/plug
- Tank Battery Signage
- Weeds

Refer to the "Location", "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspection that have not been addressed are still applicable.

Comment:	<p>It was observed in this inspection that the Operator (name) information at battery signage has partially torn off. Additional information pursuant to Rule 605.e (Telephone number at which the Operator can be reached at all times; C. Telephone number for local emergency services (911 where available); The public road used to access the Tank battery site; E. Well name(s) and API number(s) associated with the Tank battery) not posted at sign, or not legible.</p> <p>Additionally, the emergency contact number (1-855-625-9922) is no longer in service.</p>		
Corrective Action:	Comply with Rule 605.e	Date:	05/17/2024

Emergency Contact Number:

Comment:	970-285-9377	
	Inspector tested the emergency number (1-855-625-9922) posted at battery. Emergency number is no longer in service, and appears to have been the emergency line for the previous Operator. See "Battery" above.

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: It was observed in this inspection that stormwater and erosion control BMPs to manage runoff from the working pad surface are missing or insufficient; runoff from the pad is resulting in sediment deposition and degradation to the interim areas on the east and northern ends of the Location. Ditch along the western perimeter appears to discharge directly into the interim areas, and travel straight down the slope; BMPs in conjunction with the ditch to interrupt velocity or to allow sediment fallout prior to off-site stormwater discharge not apparent.

Corrective Action: Comply with Rule 1002.f- install or repair required stormwater and erosion control measures to manage runoff from the pad in a manner that minimizes erosion, degradation and sediment transport. Ensure BMPs are installed per good engineering practice, and maintained in a proper functioning condition.

Date: 04/19/2024

Pits: ☐ NO SURFACE INDICATION OF PIT
