OPERATOR COMMENT AND SUBMITTAL

Comment: Based on soil analytical results, residual arsenic, only, was identified at the site. A delineation was not proposed as the arsenic at the wellhead was comparable to that of the background sample. However, delineation and additional backgrounds will be required if the background is rejected. We will get the final report submitted as soon as possible.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
