Bradenhead Pressure Action Threshold 523 psig

This threshold is calculated per Rule 308A.b.(2)G. If this well is located in a bradenhead test area (see Rule 207.b) per an Order of the Commission, it may be subject to a different threshold.

Does the casing centralization comply with Rule 317.g? Yes

If "NO", provide details below.

Operator Comments:

This well has not yet been completed. Anticipated date of completion is 2nd Quarter 2024.  
 Top of Productive Zone footage is based on approved APD footage. Actual TPZ will be provided on the Form 5A.  
 Open Hole Logging Exception- no open hole logs were run on this well; Compensated Neutron Log run on Drake 01N (API: 0512351826) for the Cased Hole Neutron Requirement.  
 Each attachment and log run during the drilling and completion of a well is intended to fulfill a specific purpose. At times, vendors that run these logs or jobs put additional data in their report that is not critical or relevant to the technical purpose of their job. This data is not verified with PDC Energy/CVX and at times is not 100% accurate. For example, setting depths for a liner, elevation depths, set depths for casing, date casing was set or TD dates on a mwd/cbl log may not be accurate. PDC Energy/CVX confirms setting depths through either daily drilling reports or liner reports, confirms date casing was set through daily drilling reports, and confirms TD through either our Citrix system or daily drilling reports. PDC/CVX is not able to request that these vendors not include this information in their reports.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
