Operator Comments:

This sundry is being submitted to update permitted equipment on location and to update the production facility serving the wells on this oil and gas location.

This oil and gas location was originally permitted with the production facility as the H03-13 Facility (location ID 459730). During the Mustang consolidation process, that location was eliminated and determined not to be necessary, thereby reducing overall disturbance. The H01-12 Multi (location ID 459824) will be the production facility serving the wells on this pad and an updated facility layout drawing is attached for the facility.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
