General Comment:

On 4/12/2024, Reclamation Specialist Trujillo conducted a final reclamation inspection at VISION ENERGY LLC's RIFLE WALTON #25-2 location in Garfield County, Colorado.

The following compliance issues were observed during this inspection:
1004- Final Reclamation and weed management requirements.

Refer to the "Reclamation" section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Corrective Action: _____ Date _____

Comply with 1004 Rules, including Rule 1004.e (and rule 606.c). Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.

Due to the ongoing nature and duration of the observed compliance issues, a CA date is not being provided. Location will remain out of compliance until corrective action have been resolved; a follow up inspection will be conducted to ensure the compliance issues have been corrected to comply with ECMC rules.

RECLAMATION COMMENTS

trujilloam

04/15/2024

Form 6(s) 401101699 states well was P&A 8/12/2016.

On 1/1/2023, Location transferred ownership from Maralex Resources Inc, to Vision Energy LLC (Form 9 403278005).

Previous inspections observed that the Location did not meet ECMC 1004 Standards; Location lacks uniform desirable vegetative establishment; noxious weed issues apparent.

It was observed in this inspection that corrective actions taken by Operator to comply with 1004 Rules have been insufficient- Location (including the access road, and areas where production equipment was placed) are bare or vegetated predominantly by Undesirable Plant Species, including biennial weeds such as Melilotus officinalis, and Grindelia squarrosa. Weed management has also been insufficient, as noxious weeds (including Carduus nutans, Verbascum thapsus, etc...) established during the 2023 growing season are evident.

Various trash/debris/equipment/containers were also observed on the southern end of the Location.

Reclamation work, as well as ongoing weed management activities are inadequate on the Location.
