TRUCK LOADING/UNLOADING PROCEDURE
LOADING/UNLOADING OF FLAMMABLE LIQUIDS AND COMPRESSED GASES

1. A qualified leader shall be present throughout the loading/unloading process.
2. The leader must be aware of what procedures are to be followed if an emergency occurs.
3. The leader is authorized to stop the loading/unloading process whenever he/she determines it is necessary.
4. The tank car(s) or truck unit(s) must be compatible for the product being loaded/unloaded.
5. The tank car(s) or truck unit(s) must have proper placards and labels.
6. The truck's hand brake must be engaged in addition to chocking the rear wheels of the truck.
7. Prior to filling and departure, closely inspect the government label and all outside for leaks or damage.
8. Prior to filling and departure, the tank car or truck shall be bonded from the fill line to the tank car or truck.
9. Prior to connecting the fill line, the tank car or truck shall be bonded from the fill line to the tank car or truck.
10. Prior to connecting the fill line, the tank car or truck shall be bonded from the fill line to the tank car or truck.
11. Prior to connecting the fill line, the tank car or truck shall be bonded from the fill line to the tank car or truck.
12. If a spill occurs during loading, do not start the truck or allow other possible sources of ignition within 150 feet until the area is gas tested and determined to be safe.
13. If a spill occurs during loading, do not start the truck or allow other possible sources of ignition within 150 feet until the area is gas tested and determined to be safe.
14. Loading issues with quick correct fittings shall have covers secured prior to pumping.
