**COMMENTS:**

TEP Rocky Mountain LLC (TEP) is reporting that the bradenhead on the Knight W-6-4 well was previously connected to the sales line as part of a bradenhead pressure management plan for this well. TEP recently identified that this bradenhead connection was not previously reported to the ECMC based on documentation available in the ECMC database. It is unknown when this historical bradenhead connection to the sales line occurred, but it was likely completed in 2021 based on our review of the historical annual bradenhead test data. A typical diagram is attached which depicts the bradenhead connection.
