General Comment:

On 4/19/2024, Reclamation Specialist Trujillo conducted an interim reclamation and stormwater at TEP ROCKY MOUNTAIN LLC's CHEVRON-65S97W/3NWSE Location in Garfield County, Colorado.

The following compliance issues were observed during this inspection:

- Anchors not marked
- Tanks missing cap/plug
- Wildlife Protections
- Closure of rat/mouseholes.
- Good Housekeeping

Refer to the "Location", "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspection that have not been addressed are still applicable.

Comment It was observed in this inspection that the footprint of the Location has been reduced to areas reasonably needed from production.

Reclamation form #1745269 indicates a horizon of 0-10 inches. Soils observed over the interim areas appear to be predominantly subsoils, with topsoil either thinly spread over the site, mixed with the subsoils, or missing; Based on historic aerial imagery, it is not apparent that sufficient topsoil was salvaged and stored pursuant to Rule 1002.b during construction of the Location.

The overall status of the reclamation on the Location is "In process", however additional topsoil may be required during future reclamation efforts to ensure compliance with 1000 series rules.

Comment	User	Date
COMMENT #1 Pursuant to 1003.a, all pits, cellars, rat holes, and other bore holes unnecessary for further lease operations will be backfilled as soon as possible after the drilling rig is released to conform with surrounding terrain. What appears to be a rat/mouse hole was observed remaining at the wells; hole has not been properly closed, backfilled and/or removed pursuant to Rule 1003.a; Operator appears to have bent portions of the pipe over itself in an attempt to cover the hole; work/cover is insufficient to prevent access by wildlife.	trujilloam	04/23/2024
