Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

A compromised above ground produced water line resulted in fluid to spill to the ground surface. The spill was contained entirely on pad and a vac truck was dispatched to clean up standing fluid. The impacted soil will be removed and hauled for disposal. The line will be repaired, and pressure tested prior to returning to service. Confirmation soil samples will be collected and submitted in compliance with ECMC Table 915-1.
