Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

A reportable release was discovered at the Raindance FD Off-Site #20-202HNX Facility. An equipment failure led to a 36-bbl oil fluid release. Fluid was contained on-site and with-in the steel walled secondary containment structure with attached synthetic liner. No bedding material present within containment. Clean-up operations are underway.

Other (specify)

Type of Equipment at Point of Spill/Release: Other

If "Other" selected above, specify or describe here:

Strainer on LACT line.

Describe Incident & Root Cause (include specific equipment and point of failure)

An investigation into the cause of the release is ongoing. Additional information will be included in subsequent form submittal.

Volume of Impacted Surface Water Removed (bbls): 0

REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

Basis for Closure: ☐ Corrective Actions Completed (documentation attached, check all that apply)

☐ Horizontal and Vertical extents of impacts have been delineated.

☐ Documentation of compliance with Table 915-1 is attached.

☐ All E&P Waste has been properly treated or disposed.

☐ Work proceeding under an approved Form 27 (Rule 912.c).

Form 27 Remediation Project No: _____

☐ SUSPECTED Spill/Release did not occur or was below Rule 912.a.(5) reporting thresholds.

OPERATOR COMMENTS:

Soil samples are not required as spill was entirely contained within the steel walled secondary containment structure with attached synthetic liner. Photo documentation and fluid recovery calculations will be used to confirm the integrity of the liner and shall be reported on a supplemental document.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
