Latitude: 40.464444 Longitude: -104.727931

CORRECTIVE ACTIONS:

1 CA# 188243

Corrective Action: Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.

Date: 11/15/2023

Response: CA COMPLETED

Date of Completion: 04/10/2024

Operator Comment: Per inspection doc # 697504957, the Gerry 1 well (123-11099) and associated production facility meets Rule 1004 vegetative requirements. At the time of inspection, a portion of the access road failed due to weedy vegetation. Prior to the regulatory inspection, the access road revegetation was progressing at the same rate as

the former wellhead location. In Spring 2023, the well access road was impacted by the surface owner performing a prescribed burn on his property. This is documented in ECMC inspection # 697504957 via Photo 6. There is a clear line where the controlled burn impacted PDC reclamation efforts, as demonstrated in photo #6. PDC contacted the surface owner requesting they refrain from future prescribed burns at the former well access road until the location is release by the ECMC. The surface owner stated they will not refrain from prescribed burns and will continue to manage their property.
