CORRECTIVE ACTIONS:

1 CA# 192951

Corrective Action: Produce well after performing successful mechanical integrity test per Rule 417 or plug well. To maintain shut-in status, the well must be able to demonstrate ability to produce without mechanical intervention.

Date: 04/08/2024

Response: CA COMPLETED

Date of Completion: 03/14/2024

Operator Comment: This well does not fit the definition of Temporarily Abandoned as defined in ECMC 100 Series rules. Instead, this well is Shut-in due to the ECMC Director's 901.a Order dated April 12, 2021. It is capable of production without a downhole intervention, removal of a plug, or addition of equipment. KPK disagrees with the requirement to conduct an MIT on this well and has previously requested a partial withdrawal of the 901.a Order and the ability to unload well liquids thereby resetting the clock for MIT testing. In the alternative, KPK proposed continuously

monitor bradenhead pressures to satisfy the MIT requirement; this practice was previously approved and implemented by another operator. KPK renews it request to unload the Shut-in 901.a Order wells.
