Comment _____

The location and access road have not been adequately stabilized to minimize erosion, alteration of natural features, removal of surface materials and degradation due to contamination. Given the inadequacies of the above, overtime this could have a potential impact on Greater sage grouse priority habitat and other big game priority habitats nearby. Refer to the attached inspection photos.

Comment:

The location and access road have not been adequately stabilized to minimize erosion, which is resulting in sediment laden stormwater discharging from location. Operator has failed to implement BMPs to control stormwater runoff in a manner that minimizes erosion, transport of sediment offsite and site degradation.

Corrective Action:

Comply with Rule 1002.f.

BMPs shall be maintained until the location is abandoned and final reclamation is achieved pursuant to Rule 1004.
