**General Comment:**

On 3/28/2024 ECMC staff, Kris Neidel inspected Rabbit Ears location. The location was mostly covered in snow and puddled water. The well was SI at the time of inspection. It appears that tanks have been removed from inside the engineered secondary containment. ECMC has not received a Remediation workplan for the decommissioning of this facility. Corrective Action: Per Rule 913.a, a Form 27 workplan should be submitted for the decommissioning of the tanks that were removed. Any corrective action(s) from previous inspections that have not been addressed are still applicable See attached photos.

**Location Construction**
