

WATER PLAN

Date: 11/10/2023

Location: OGDG SKR 698-10-BV / SKR 698-10-BV Pad

Legal Description: Tract 72, SWSW of Section 10 & NWNW of Section 15, Township 6 South, Range 98 West, 6th P.M., Garfield County, Colorado

Location Information

This document provides site-specific information for the SKR 698-10-BV Pad. The information in this document relates specifically to the time during the construction, drilling, completion, and production of the two (2) proposed horizontal wells on the well pad portion of the location, and the construction and operation of the facility portion of the location, which will receive production from the two wells. Additionally, a pilot hole for geothermal testing will be drilled in one of the wells, but the pilot hole will be plugged back prior to drilling the horizontal leg of the well.

The existing location is located off Garfield County Road 211 (Clear Creek Road) approximately 16.7 miles northwest of De Beque, Colorado. The Pad lies on Tract 72, and is situated on two sections, the SWSW of Section 10 and the NWNW of Section 15, Township 6 South, Range 98 West, 6th P.M. zoned Resource Lands per Garfield County.

Water Sources

Source Details

Ahead of completion activity, construction and drilling activities will utilize additional, but significantly smaller, water volumes. Typically, these water volumes are supplied independently of the completion water sources and may be trucked to location. Various water sources may be used for construction and drilling; sources will be selected based upon limiting trucking distance and minimizing adverse impacts related to construction and drilling activities. Table 1 below presents potential drilling and construction water source types, volumes, and locations.

Table 1: Construction and Drilling Sources - SKR 698-10-BV Pad

<u>Source Name</u>	<u>Source Type</u>	<u>Latitude</u>	<u>Longitude</u>	<u>Est. Volume (BBLs)</u>	<u>Transport Method</u>
Chevron Skinner Ridge Freshwater Pond	Surface Water	39.572450°N	108.347722°W	4,000	Trucked

Below are the seller's name and address of water sources planned for construction and drilling:

Chevron Skinner Ridge Freshwater Pond
Chevron Ranch Headquarters
8311 County Road 215
Parachute, Colorado 81635

All freshwater for downhole frac operations will be moved by pipeline to minimize risks to public health, safety, environment, and wildlife. Temporary infrastructure will be constructed as needed to convey water sources to the Pad for development activities. Planned water source types, volumes, and locations are summarized below in Table 2.

Table 2: Completion Source - SKR 698-10-BV Pad

<u>Source Name</u>	<u>Source Type</u>	<u>Latitude</u>	<u>Longitude</u>	<u>Est. Volume (BBLs)</u>	<u>Transport Method</u>
West Divide Water Conservancy District	Surface Water	39.366553°N	108.257089°W	1,440,000	Piped

Below are the seller's name and address of water sources planned for completions:

West Divide Water Conservancy District
P. O. Box 1478
818 Taughenbaugh Blvd., #101
Rifle, CO 81650

Water Recycling or Re-Use

The use of recycled produced water at the SKR 698-10-BV Pad is not planned due to the lack of existing infrastructure and extensive distance between the location and existing recycled water sources. Chevron is dedicated to increasing recycled water usage and will continue to explore opportunities to utilize recycled water at the Pad.
