Comments: 2022 1st post-production test had 254 PSI that blew down to 0 psi after the first minute with no flow for the remainder of the test. November 2023 annual test had 13 PSI that blew down to 0 PSI in seconds with no flow or pressure for the entire test. Bradenhead gas determined to be thermogenic gas with somewhat similar composition as the production gas sample. PDC will continue to remediate pressure using fluid displacement.
