(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Date of work October 24, 1974

Drilled to 570'. Ran 556' of 8 5/8" 28# used surface casing set at 565' KB. Cemented with 400 sacks. Went in hole and hit bridge at 280'.
Lost hole ... skidded rig to Leppla Estate X-2 well.
Determined bridge was the result of parted casing. Therefore, the 400 sacks of cement was between 280' and 570' from bottom, but sufficient cement circulated behind the upper 280' of 8 5/8" that it could not be pulled. The pipe was cut off at the surface and a 10-sack plug set in the top of the 8 5/8" on 10/24/74.
