Comment:

There was a form 4 notice submitted last year that indicated a variance request would be submitted for reclamation. The access road and location have not been recontoured back to pre-existing conditions. The center of the location is not establishing vegetation and there could be soil issues preventing revegetation. The electric utility remains at the location. There is a noxious weed/tree (Russian olive) along the road that needs to be removed. The location will remain out of compliance until final reclamation has occurred or by an approved variance. Additional stabilization will have to occur at the location for long term stormwater control.
