OPERATOR COMMENTS AND SUBMITTAL

Comments Desert Eagle Operating (DEO) proposes to develop helium gas using a single conventional vertical helium gas well at the location. The well will be drilled with air. There will be no drilling mud, hydraulic fracturing, stimulation, or flowback. The well is not expected to produce hydrocarbons or water, based on results from DEO wells already drilled in the area. The location will be in a remote area on private ranchland. If the well is developed for production, the location will contain only a wellhead. Helium gas will be piped to DEO's existing off-site helium processing unit using an off-location flowline tie in to DEO's existing buried gathering system. At the helium processing unit, compressed helium will be loaded into a tube trailer for transport by truck.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
