Comments:

Final reclamation of the Zahm 29-3 well pad was completed in 2009 with additional reclamation completed in 2015. Based on surface owner requests the historical access road was left in place. The associated variance request was approved on February 21, 2024 through Final Order No. 1-346 (Docket Number 230300098). The remainder of the Well Site was recontoured and reclaimed. Qualitative monitoring and 2022 quantitative vegetation surveys show that final reclamation of the well pad disturbance is successful and a vegetative community has been reestablished that matches adjacent reference area composition and cover. Please see the attached vegetation survey report indicating that the reclaimed surface meets Rule 1004 standards. The property's vegetation is severely degraded by a large prairie dog colony. This degradation can be seen overtime through aerial imagery and COGCC inspection photos: Inspection #668800242 identifies desirable vegetation cover as passing final reclamation standards.
