Description of Corrosion Protection

Crestone pipelines are covered in a protective external coating. Flowlines are subject to thorough inspections and fabrication standards during installation to minimize coating and pipe defects. Crestone maintains a chemical program to reduce internal corrosion. If a flowline is found to lack integrity, Crestone will investigate, report, and remediate any spills in accordance with the 900 series rules.

Description of Integrity Management Program

Crestone flowlines are pressure tested prior to placing flowlines into service. Flowlines are tested on an annual basis in accordance with COGCC 1104 series rules. If a flowline is found to lack integrity, Crestone will investigate the root cause, as well as report and remediate any spills in accordance with the 900 series rules. All repairs will be completed in accordance with COGCC 1102 Series rules.

Description of the construction method used for public by-ways, road crossings, sensitive wildlife habitats, sensitive areas, and natural and manmade watercourses (i.e., open trench, bored and cased, or bored only), if applicable.

**OFF LOCATION FLOWLINE Abandonment Verification**

Date: 08/10/2023

**Abandonment Verification**

The abandoned Off-Location Flowline was located within the jurisdiction(s) of the following local government(s).  
(No Jurisdiction)

**Description of Abandonment Verification:**

The flowline serving the Aristocrat Angus 2-4 (05-123-34039) and Aristocrat Angus 0-2-4 (05-123-30826) was originally planned to be removed in its entirety via the open trench method. However, after field operations began, it was determined the line could not be fully removed due to other active lines in the vicinity. As a result, the flowline was partially abandoned in place. The segment abandoned in place is in accordance with Rule 1105.d. requirements. See attached exhibit for third party verification and flowline path layout drawing.

**OPERATOR COMMENTS AND SUBMITTAL**

Comments

Form 44 filed to report POST-ABANDONMENT verification. The following flowline was abandoned in place: 1233082612334039\_FL: serviced Aristocrat Angus 2-4 (05-123-34039) and Aristocrat Angus 0-2-4 (05-123-30826) Pressure test attached. Third party verification attached. Updated GIS data attached.  
The 1233082612334039\_FL was abandoned in place and does not have any associated spill/releases reported on a Form 19.  
All other related flowlines will remain as previously reported.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
