FIELD INSPECTION FORM

Loc ID: 315979 Inspector Name: Trujillo, Aaron On-Site Inspection: 2A Doc Num: _____

Status Summary:

- THIS IS A FOLLOW UP INSPECTION
- FOLLOW UP INSPECTION REQUIRED
- NO FOLLOW UP INSPECTION REQUIRED

Operator Information:

ECMC Operator Number: 3104
Name of Operator: ANSCHUTZ EXPLORATION CORP
Address: 555 17TH ST STE 2400
City: DENVER State: CO Zip: 80202

Findings:

- 9 Number of Comments
- 2 Number of Corrective Actions
- Corrective Action Response Requested

ANY CORRECTIVE ACTION(S) FROM PREVIOUS INSPECTIONS THAT HAVE NOT BEEN ADDRESSED ARE STILL APPLICABLE

General Comment:

On 6/14/2024, Reclamation Specialist Trujillo conducted an inspection at Anschutz Exploration Corp's PRF-63N97W/21NESE location in Rio Blanco County, Colorado.

Location Is Federal Surface, Federal Mineral.

This is also a follow-up inspection to #696205703 to document compliance with the following corrective actions:

The following compliance issues were observed during this inspection:

- Good Housekeeping
- Protection of Soils
- Weeds
- Anchors missing required Marking
- Signage Requirements
- Wildlife Protection requirements
- Sanitary facility not secured
- Fluids in containment

It was observed in this inspection that corrective actions to manage weeds remain outstanding.

Refer to the "Location" and "Reclamation" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspection that have not been addressed are still applicable.

ECMC Comments

Comment	User	Date
<p>COMMENT #1</p> <p>Inspection #696205703 observed soil stockpiles on the southwest, west and northwestern ends of the Location; stockpile observed on the west end of the Location appears to be topsoil. Inspection observed that Operator appears to be using the stockpile on the southern end of the Location as a borrow area resulting in unstabilized soils, and sediment transport. Undesirable and Noxious Plant species (Halogeton) also observed established on the stockpiles. BMPs to protect stockpiles on Location from contamination, compaction, wind and water erosion, as well as to prevent weed establishment are inadequate.</p> <p>It was observed in this inspection that work to address the disturbed areas at the southern soil stockpile has been conducted.</p> <p>It was also observed that work to address the weed issues at the stockpiles has not been performed (as indicated by Operator on Location). Halogeton germination evident. Additionally, Bulbous Bluegrass (Poa bulbosa) was also observed on the stockpiles- Bulbous bluegrass plants have already reached maturity and seeded out; corrective actions have not been taken during the appropriate time frame, or by the corrective action date to address weed establishment and spread.</p> <p>This CA remains applicable. Additional weed management planning and strategies will be necessary to address noxious weeds on the Location</p>	trujilloam	06/18/2024
