Dear Director:

Noble Energy, Inc. (“Noble”) intends to drill and produce the above referenced horizontal oil and gas well(s), to be located as noted above. Noble respectfully requests the Director to approve an exception to Rule 408.r for the referenced proposed wells, as suitable gamma ray and resistivity logs exist in the records from prior wells drilled in the vicinity of the surface-hole location of the proposed well(s).

The logs from the following prior-drilled wells is proposed to provide adequate log coverage to characterize the geology of the area.

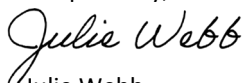

Well name(s) with Log	API Number	Distance to Well*	Direction to well	Log Document Number(s)	Type of Log
SCHRANT #23-12	05-123-22290	1200	SW	1439850	IND-GR
LAPP #33-12	05-123-27055	650	SE	1368153	IND-GR
FOSS #13-12	05- 123-22780	3000	S	1457850	IND-GR

*Distances measured from center of pad location

One of the first wells drilled on the pad will be logged with Cased hole Pulsed Neutron Log with Gamma Ray Log from kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run in that well and have those logs attached. The Form 5 for each well shall clearly state “Open-hole logging exception - No open-hole logs were run” and shall clearly identify the type of log and the well (by API#) in which open-hole logs were run. Noble hereby requests the Director to grant an exception to Rule 408.r.

If you should have any questions or concerns regarding this permit, please contact the undersigned at 303-228-4422.

Respectfully,

Julie Webb
 Sr. Regulatory Analyst
