General Comment:

Environmental staff, Kris Neidel inspected the well pad. The Operators Environmental staff was on location collecting samples per REM #34336. The location of the wellhead was assumed to be at the tee post that was in the ground. The following was observed; 2 rig anchors were observed; one on the north east side and one on the north west side of the pad. The anchors were cables. There is a electrical subpanel (Disconnect) mounted on an electrical pole. At the Tee post/wellhead, there was; a pipe and a wire coming out of the ground. Corrective Actions: remove all equipment that was used for production, such as Electrical, piping and rig anchors. Any corrective action(s) from previous inspections that have not been addressed are still applicable See attached See attached Photos.
