Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

**INITIAL ACTION SUMMARY**

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

On 10/19/2021 under the previous operator a release occurred at the horsetail 07F well pad. Less then 1 bbl was released from a needle valve on the wellhead. The mist covered a 50x 35 area and left the location. The release was not closed out under the previous operator and additional remediation was recently conducted.

**PROPOSED SAMPLING PLAN**

**Proposed Soil Sampling**

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Initial investigation samples were collected on 8/28/2023 on the surface where the misting occurred. Initial analytical results indicated no organics were present however, SAR and PH exceeded table 915 limits and site specific backgrounds. Additional scraping was completed removing exceedances in SS-3. All constituents are in compliance across the mist zone accept for SS-1 near the wellhead. On 1/16/2024 remedial excavation was conducted and excavation samples were collected near the wellhead. SW-1 through SW-3, and Bottom Hole 1 contained exceedances of SAR and PH . Additional excavation has been completed and along with sampling, and we are awaiting sampling results. The Analyzed constituents list has been reduced to SAR and PH as all other constituents are in compliance. Additional backgrounds have been collected for comparison.

**Proposed Groundwater Sampling**

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Based on DWR info from the Horsetail 07 West site groundwater is at a depth of 200' in this area. Due to groundwater being at this depth, and the area containing consolidated siltstone, the pathway to groundwater has been eliminated, defaulting the analytical comparison to residential soil screening limits.

**Proposed Surface Water Sampling**

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

**Additional Investigative Actions**

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Additional investigation/ remediation may be required following review of pending analytical results.

## OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

A total of 5 background soil samples were collected in accordance with the 915 guidance. All backgrounds were collected at a sufficient distance from the release location, on and off pad to most accurately reflect the same soil horizon confirmation soil samples were collected in.

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) \_\_\_\_\_ Volume of liquid waste (barrels) \_\_\_\_\_

Is further site investigation required?

Additional investigation/ remediation may be required following review of pending analytical results.

## REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

### SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

The release occurred under the previous operator. Following Fundare investigation and discovery of existing impacts remedial excavation was completed to remove impacts. No free product was present during Fundare investigation or signs of impacts.

### REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Initial investigation samples were collected on 8/28/2023 on the surface where the misting occurred. Initial analytical results indicated no organics were present however, SAR and PH exceeded table 915 limits and site specific backgrounds. Additional scraping was completed removing exceedances in SS-3. All constituents are in compliance across the mist zone except for SS-1 near the wellhead. On 1/16/2024 remedial excavation was conducted and excavation samples were collected near the wellhead. SW-1 through SW-3, and Bottom Hole 1 contained exceedances of SAR and PH. Additional excavation has been completed and along with sampling, and analytical results are pending. Additional Background sample results are pending.

### Request Alternative Reporting Schedule:

Semi-Annually    Annually    Other

Rule 913.e:

After initial approval of a Form 27, the Operator will provide quarterly update reports in a Supplemental Form 27 to document progress of site investigation and remediation, unless an alternative reporting schedule has been requested by the Operator and approved by the Director. The Director may request a more frequent reporting schedule based on site-specific conditions.

## Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).  
If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

Fundare has the required sufficient insurance to fully address the anticipated costs of Remediation, including the remaining estimated costs for this project. Fundare has general liability insurance and financial assurance as required by COGCC rules.

Operator anticipates the remaining cost for this project to be: \$ 7000 \_\_\_\_\_

## WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? Yes

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

There is no beneficial use of the E&P waste generated.

# REMEDIATION COMPLETION REPORT

## REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

If YES:

Compliant with Rule 913.h.(1).

Compliant with Rule 913.h.(2).

Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards? \_\_\_\_\_

Does the previous reply indicate consideration of background concentrations? \_\_\_\_\_

Does Groundwater meet Table 915-1 standards? \_\_\_\_\_

Is additional groundwater monitoring to be conducted? \_\_\_\_\_

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

## RECLAMATION PLAN

### RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Once remedial excavation is complete and impacts have been removed, interim reclamation will be completed following the 1000 series reclamation rules, and the site will be returned to pad material.

Is the described reclamation complete? No

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim

Final

Did the Surface Owner provide the seed mix? No

If YES, does the seed mix comply with local soil conservation district recommendations? \_\_\_\_\_

Did the local soil conservation district provide the seed mix? No

### SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. 06/17/2024

Proposed date of completion of Reclamation. 06/24/2024

## IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

### PRIOR DATES

Date of Surface Owner notification/consultation, if required. 10/19/2021

Actual Spill or Release date, or date of discovery. 10/19/2021

### SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 08/28/2023

Proposed site investigation commencement. 08/28/2023

Proposed completion of site investigation. 09/28/2023

### REMEDIAL ACTION DATES

Proposed start date of Remediation. 10/02/2023

Proposed date of completion of Remediation. 03/21/2024

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

Change from approved implementation schedule per Rule 913.d.(2).
