To: pat.dolezal@ownresources.com, James Krehmeyer <james.krehmeyer@ownresources.com>, Brandon Marette - DNR <brandon.marette@state.co.us>, Lexi Hamous-Miller - DNR <lexi.hamous-miller@state.co.us>

Good afternoon Pat and James,

In my review of the Form 6 (Doc # 403827870) submittal for the NEWBANKS 2-14 well (API# 05-125-07170), I noted that the well lies within a Rule 1202.d Greater Prairie Chicken Production Area. This HPH requires consultation prior to any plugging and abandonment operations. Copied on this email are Brandon Marette and Lexi Hamous, CPW contacts. Please coordinate with CPW on completing the required consultation. Once the consultation has occurred, please provide consultation summary advising of any agreed upon BMPs or COAs pertaining to the proposed P&A.

For now, the Form 6 will be on hold for any further review or processing.

Light green area is Greater Prairie Chicken Productivity Area, the darker green is a lek site.

Thank you,  
Julie

Hi Pat and James,  
If you could provide a plan for P&A and corresponding BMPs, I would be happy to get back to you with our recommendations. Thanks

Lexi

We plan to start plugging operations on all wells in August and be done by end of year. Our understanding is that no work to be performed between March 1 to June 30, pertaining to prairie chickens.

Regards

Pat Dolezal

Hi Pat,

That is correct, CPW agrees with this timing as long as it does not extend into the production period (March 1 to June 30).  
Thank you!

Lexi

Thanks for quick response. We plan to plug well late summer, early fall and be done with surface reclamation before winter.

Pat
