Hi Tommy,

After our review of the planned P&A's, below are suggestions that Colorado Parks and Wildlife has in regard to the implementation of this project.

1. FRICO 37-15 is within .5 mile of Bald eagle Nest as well as the Bald Eagle winter night roost HPH so CPW recommends conducting work outside of the nesting season Dec 1- July 31st or after the nest has fledged, confirmed by a qualified biologist.

For the other sites, we agree with your below listed BMPs.

If any questions arise, feel free to contact me. Have a great rest of your day.
