Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

This oil and gas Location is in the COGCC Orphaned Well Program. This initial Form 27 is submitted for site investigation activities performed during decommissioning of Oil and Gas Facilities.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Grab soil samples will be collected from areas most likely to exhibit E&P Waste impacts. Soil samples will be submitted for analysis of Table 915-1 parameters.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Groundwater samples are not expected to be collected as part of this investigation.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Surface water samples are not expected to be collected as part of this investigation.

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):

No additional alternative investigative actions are expected to be conducted as part of this site investigation.

OTHER INVESTIGATION INFORMATION☐ Were impacts to adjacent property or offsite impacts identified?☒ Were background samples collected as part of this site investigation?

A site-specific background soil sample ID #322201_BK01@3', was collected northwest of the Running Creek State #11 tank battery location and submitted for laboratory analysis of soil suitability for reclamation parameters (EC, pH, SAR, Boron) and Table 915-1 metals (As, Ba, Cd, Cr 6+, Cu, Pb, Ni, Se, Ag, Zn).

☐ Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards)

Volume of liquid waste (barrels)

☒ Is further site investigation required?

Additional site investigation and remediation are required to delineate the vertical and lateral extent of impacts and remediate impacted soils to meet Table 915-1 concentrations/levels.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

If E&P Waste impacts are encountered during decommissioning of Oil and Gas Facilities, impacted soils will be excavated, temporarily stockpiled on location, and hauled to a commercial disposal facility.

REMEDIAL ACTION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

If E&P Waste impacted soils are encountered the soils will be excavated and removed. If the horizontal and vertical extent of the E&P Waste impacts cannot be defined or removed during this initial action, then additional site investigation and remediation will be performed at a later date under an approved supplemental Form 27. Site data will be evaluated and remediation technologies implemented to meet Table 915-1 soil residential screening levels, protection of groundwater screening levels, or Table 915-1 groundwater and WQCC Regulation 41 numeric and narrative levels as applicable to site conditions.

Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

Smith Energy Corp. is in the ECMC Orphaned Well Program (OWP). The OWP will use the Operator's bond or other state and federal funds to investigate, remediate, and reclaim the location.

Operator anticipates the remaining cost for this project to be: \$ _____

OPERATOR COMMENT

The SMITH ENERGY CORP - 70385 RUNNING-CREEK STATE-66S64W 16SE14W (Location #322201) remote Tank Battery and related RUNNING CREEK STATE #11 (OWP) oil and gas well (API #05-039-06583) and off-location flowline are in the ECMC Orphaned Well Program (OWP). Civitas Resources/Extraction Oil & Gas LLC will plug and abandon the Running Creek State #11 (OWP) well as part of a public project at a future date. The OWP oversaw decommissioning of the tank battery and off-location flowline abandonment in place as requested by the surface landowner. Groundwater was not encountered in the excavations and is expected to lie at depths greater than 100 ft below ground surface (bgs). This supplemental Form 27 presents the site investigation results for soil samples collected during the tank battery decommissioning. A spill/release (#484700) was discovered at the produced water vault (PWV) with pH and SAR levels above the Table 915-1 soil suitability for reclamation parameter levels at 6 ft bgs. A spill/release was also encountered at the separator with total petroleum hydrocarbons (TPH) reported at 1813 ppm and several polycyclic aromatic hydrocarbons (PAH) reported above Table 915-1 soil screening levels (SSL) in a soil sample collected at 2 ft bgs. Additional site investigation and remediation will proceed under Remediation Project #26797.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
