Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

At approximately 9:30am on 7/6/2024, landowner called UGC personnel to respond to a spill/release which daylighted from the subsurface on their property. UGC field personnel immediately responded to the spill, and shut in the Hill 9-31 well, which produces into the affected pipeline. UGC personnel then contacted local hydrovac company to remove spilled oil/produced water mixture from the surface. The hydrovac company (Badger Daylighting), will remove all surface impacts by the end of the day 7/6/2024. Additional spill/release information is located on the attached report.

No	Rule 912.b.(1).J: A Release that results in natural gas in Groundwater.

**OPERATOR COMMENTS:**

Utah Gas Corp plans to do exploratory excavation to repair the pipeline, and will collect soil samples at that time. Groundwater will be sampled if encountered during initial site investigation, and both soil and water (if encountered) will be tested for constituents under Table 915. The ECMC will be notified of the location of the failure in the pipeline, once the affected area has been excavated.
