WARNING - This message is from an EXTERNAL SENDER - be CAUTIOUS, particularly with links and attachments.

Scott,

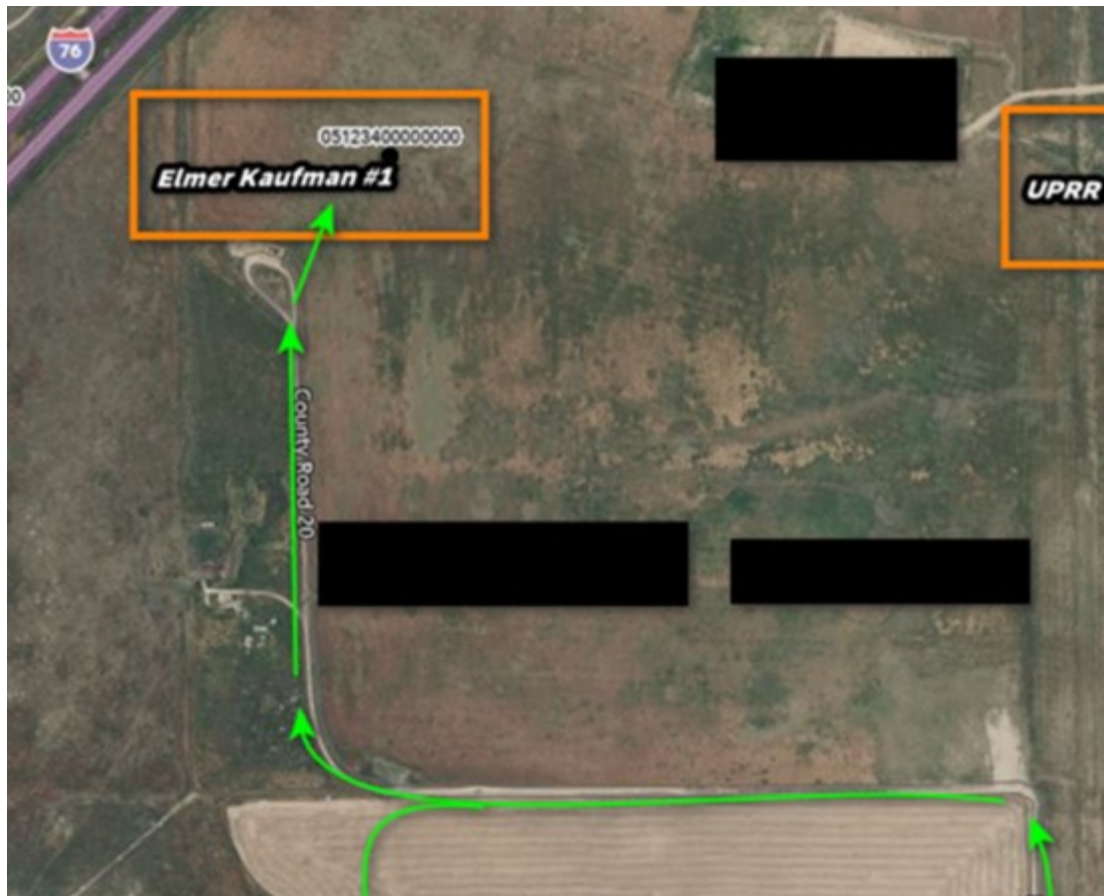

You have permission to bring in the rigging unit in on the property.

Hi Carol,

The team was able to locate the Wright 1 well North of your house. The map below shows how the team would access the well. They did say there is a water line that crosses the access route. Normally a ramped culvert would be installed over the line and removed when the work is completed. The rig will need about 2 acres of space to safely operate. The team would like to bring the well back to surface as early as June 11th. Let me know if you have any other questions and If you are ok with the work a return email stating that we are good to enter the property and re-plug the well.

Thank you,

Scott Myhr
