## Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

**INITIAL ACTION SUMMARY**

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

On 2/29/2024 six (6) background samples were collected from 3 locations around the Peck TB. Analytical results from 10/25/2023 indicated elevated pH levels at 4 of 5 sample locations. BG2 at 4' exceeded Table 915-1 pH levels. See attached site investigation report for maps and the analytical report. Confirmation samples will be collected at SP1, SP3, and SP4, along with additional soil sample locations to vertically and laterally delineate pH levels. Soil Samples will be analyzed for Table 915-1 pH Levels. Following discussion with the landowner, a reclamation plan will be submitted addressing the pH and included in the next Form 27 submittal (note: cropland).

Confirmation samples will be collected at SP1, SP3, and SP4, along with additional soil sample locations to vertically and laterally delineate pH levels.

**Proposed Groundwater Sampling**☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered, a minimum of one grab sample will be collected as soon as practical. Groundwater sampled will be analyzed for Table 915 -1 Groundwater Inorganic Parameters (total dissolved solids, sulfate, chloride) in addition to Organic Compounds.
