Comment:

<p>It was observed in this inspection that reclamation has not been performed in accordance with 1004 Rules.</p> <p>Though desirable perennial vegetative establishment is largely uniform throughout the Location, the access road has not been recontoured, regraded and reclaimed. Additionally, Undesirable Plant Species (Canada Thistle, Bull Thistle, Houndstongue, Bindweed) have established throughout the Location and access road; ongoing weed management efforts do not appear to be occurring, or have been inadequate. Erosion degradation also evident along the access road; ongoing stormwater management also does not appear to be occurring, or has been inadequate.</p> <p>The perimeter fence also has not been maintained.</p>		<p>Date 08/31/2024</p>
Corrective Action:	<p>Comply with 1004 Rules including, but not limited to, recontouring/regrading and reclamation of the access road. Ensure erosion controls are implemented to stabilize the seeded soil, and ongoing stormwater management to minimize erosion, degradation and sediment transport is occurring pursuant to Rule 1002.f.</p> <p>Comply with Rule 1004.e and 606.c and conduct weed management: ongoing weed management to keep Location free of all Undesirable Plant Species required until Location receives a passing final reclamation inspection.</p> <p>Maintain perimeter fence.</p>	
<p>Overall Final Reclamation Fail Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/></p>
