General Comment:

On 7/8/2024, Reclamation Specialist Trujillo conducted a final reclamation inspection at Chevron Usa Inc's CHEVRON SHALE #1-25A CHEVRON location in Garfield County, Colorado.

The following compliance issues were observed during this inspection:
-1004 Final Reclamation.

Refer to the "Reclamation" section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspection that have not been addressed are still applicable.

Corrective Action: _____ Date _____

Comply with Rule 1004.a and conduct reclamation on the Location and access road including, but not limited to, recontouring/regrading, replacement of topsoil and revegetation activities. Ensure erosion controls are implemented to stabilize the seeded soil pursuant to Rule 1002.f. Comply with Rule 1004.e and 606.c and perform ongoing weed management; Oil and Gas Locations will be kept free of all Undesirable Plant Species.

Continue to monitor and manage the Location; ongoing stormwater and weed management required until the site receives a passing final reclamation inspection.

Form 6(s) #400682542 states well was P&Ad 8/8/2014.	trujilloam	07/09/2024
On Operator submitted Form 4 #401407509 stating "Final Reclamation was complete".		
Inspection #692400010 observed that final reclamation of the Location has not been performed in accordance with 1004 Rules:		
"Location & Access Road have not been re-contoured & reclaimed. Debris and facilities have been removed. Operator indicated that Pad area had been seeded after Well was PA'd. Portions of site have good establishment of perennial vegetation though pad area remains compacted & areas are bare or sparsely vegetated. Tops of Berms (which may be topsoil) around site are not revegetated & appear to be used for livestock access & loafing areas. This site shows most pronounced Cut slope & has largest compacted, unvegetated area of the 3 Locations visited. Weed, Mullein established on site shows evidence of having controls applied".		
Inspection required Operator to comply with 1004 Rules.		
It was observed in this inspection that the Location remains out of compliance with ECMC Rules and Corrective actions: Location and access road have not been recontoured/regraded, and reclaimed in accordance with Rule 1004.a. Cut and fill slopes remain apparent. Additionally, topsoil remains bare and stockpiled on the north, west and southeastern ends of the Location, and has not been replaced. Undesirable Plant Species (Mullein) have continued to establish and spread on the Location and access road.		
This corrective action per #692400010 has not been addressed and remains applicable.
