Description of Corrosion Protection

Crestone pipelines are covered in a protective external coating. Flowlines are subject to thorough inspections and fabrication standards during installation to minimize coating and pipe defects. Crestone maintains a chemical program to reduce internal corrosion. If a flowline is found to lack integrity, Crestone will investigate, report, and remediate any spills in accordance with the 900 series rules.

Description of Integrity Management Program

Crestone flowlines are pressure tested prior to placing flowlines into service. Flowlines are tested on an annual basis in accordance with COGCC 1104 series rules. If a flowline is found to lack integrity, Crestone will investigate the root cause, as well as report and remediate any spills in accordance with the 900 series rules. All repairs will be completed in accordance with COGCC 1102 Series rules.

Description of the construction method used for public by-ways, road crossings, sensitive wildlife habitats, sensitive areas, and natural and manmade watercourses (i.e., open trench, bored and cased, or bored only), if applicable.

OFF LOCATION FLOWLINE Pre-Abandonment Notice

Date: 07/28/2024

Pre-Abandonment 30-day Notice

Removed per Rule 1105.d.(2)

Abandoned In Place per Rule 1105.d.(2) Exceptions - select all that apply:

A. A surface owner agreement executed by a surface owner allows abandonment in place.

B. The line is subject to the jurisdiction of the federal government, and the relevant federal agency directs abandonment in place.

C. The flowline or crude oil transfer line is co-located with other active pipelines or utilities or is in a recorded right of way.

D. Removal of the line would cause significant damage to natural resources, including wildlife resources, topsoil, or vegetation.

E. The flowline or crude oil transfer line is in a restricted surface occupancy area or sensitive wildlife habitat.

F. The flowline or crude oil transfer line or a segment of the line crosses or is within 30 feet of a public road, railroad, bike path, public right of way, utility corridor, or active utility or pipeline crossing.

G. The flowline or crude oil transfer line or a segment of the line crosses or is within 30 feet of or from under a river, stream, lake, pond, reservoir, wetlands, watercourse, waterway, or spring.

H. The operator demonstrates and quantifies that the removal of the flowline will cause significant emissions of air pollutants.

Abandoned In Place per Rule 1105.d.(3)

Description of Pre-Abandonment Notice:

Flowline (01306583_FL) is co-located located in the same trench as the Shaffer Newman 1-8-13 (01306582_FL) and Shaffer Newman 13-13 (01306539_FL). Flowline will be abandoned in place as per Rule 1105.d and verified by a third party. See attached exhibit for flowline path. This Form 44 is an update to previously submitted Form 44, doc #403650007.

OPERATOR COMMENTS AND SUBMITTAL

Comments Form 44 filed to report PRE-ABANDONMENT notification. The following flowline will be abandoned in place: 01306583_FL: serviced the SHAFFER NEWMAN 24-13 (05-013-06583) 01306583_FL does not have any spill/releases reported on a Form 19. GIS data has previously been submitted. It is anticipated that abandonment operations will start on or about 7/28/2024.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
