

**TRADE SECRET CLAIM OF ENTITLEMENT**

If a chemical used in the hydraulic fracturing treatment of a well is entitled to trade secret protection, the operator must still provide information on its chemical family to FracFocus. The supplier, service company or operator, as applicable, must also provide the identity of a trade secret chemical to a health professional that satisfies certain conditions (immediate disclosure is required in medical emergencies). At the time of claiming that a chemical, concentration, or both is a trade secret, the vendor, service company or operator must file a Form 41 with the Commission to provide accurate contact information. If the contact information changes for the party maintaining trade secret protection they must immediately submit a new Form 41 with the current information.

For purposes of Rule 205A, the term "trade secret" is defined in the COGCC Series 100 Definitions (Nov. 2011 version).
