Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OTHER INVESTIGATION INFORMATION

☐ Were impacts to adjacent property or offsite impacts identified?

☒ Were background samples collected as part of this site investigation?

Background samples were collected in area considered unaffected by the pit

☐ Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards)

Volume of liquid waste (barrels)

☐ Is further site investigation required?

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Beren Corporation, the previous operator, removed and abandoned the production facility. Fritzler Resources, Inc. did not operate the Beren's Former Simpson "A" production pit which had been closed prior to Fritzler's acquisition of the Simpson lease. The Commission issued to Beren Corporation on November 1, 2002, a Notice of Violation regarding the historic production pit. Fritzler voluntarily agreed to remediate the historic production pit. See March 4, 2004, correspondence to the Commission

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

A Form 27 was submitted in April 2004 and approved by the Commission. Fritzler promptly removed all the remaining piping and debris. The Commission approved a sampling grid to test for soil impacts and the sampling and analysis report was submitted to the Commission in August 2004. The Commission approved re-seeding of the area and subsequent reviews to evaluate the re-vegetation.

Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

Fritzler Resources Inc has provided the general liability insurances as required.

Operator anticipates the remaining cost for this project to be: \$ 1500

WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? No

REMEDIATION COMPLETION REPORT

REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

If YES:

☐ Compliant with Rule 913.h.(1).

☐ Compliant with Rule 913.h.(2).

☐ Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards?

Does the previous reply indicate consideration of background concentrations?

Does Groundwater meet Table 915-1 standards?

Is additional groundwater monitoring to be conducted? _____

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

The area was ripped and disked and native grasses were planted in 2004. Since 2004, the area has been seeded four times, 2007, 2010, 2014 and 2019. The upper or southern areas have been revegetated. The lower area has been re contoured and seeded. Mulching and addendums were added to the lower section. Additional cultivating, disking and seeding in addition to 2019 was done in 2021 and fall of 2023. Fritzler Resources will consult with the surface owner to evaluate whether additional seeding is required based on surface owner's future use.

Is the described reclamation complete? Yes _____

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

☒ Interim ☐ Final

Did the Surface Owner provide the seed mix? No _____

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? No _____
