ECMC Comments

Comment	User	Date
<p>COMMENT #1</p> <p>Previous inspections (#696205703, #696205883) observed soil stockpiles on the southwest, west and northwestern ends of the Location; the stockpile observed on the west end of the Location appears to be topsoil. Inspection observed that Operator appears to be using the stockpile on the southern end of the Location as a borrow area resulting in unstabilized soils, and sediment transport. Undesirable and Noxious Plant species (Halogeton, Bulbous Bluegrass) also observed established on the stockpiles. BMPs to protect stockpiles on Location from contamination, compaction, wind and water erosion, as well as to prevent weed establishment are inadequate.</p> <p>Inspection #696205883 observed that work to address the disturbed areas at the southern soil stockpile has been conducted; though work to address the weed issues at the stockpiles has not been performed).</p> <p>It was observed in this inspection that the BMPs implemented at the southern stockpile (Erosion Logs, Erosion Blankets) have not been installed or maintained in a proper functioning condition. Additionally, weed management efforts have not been performed, or have been insufficient at the soil stockpiles; Undesirable Plant Species continues to establish on the soil stockpiles..</p> <p>This CA remains applicable.</p>	trujilloam	07/22/2024
