Operator Comments:

We have a single steel tank on this location that we suspect has leaks. We propose to replace the steel tank with a fiberglass tank from an offset OOS location 1/4 mile away. We will do the required soil testing under the steel tank at removal and utilize the existing containment . The fiberglass tank will have identical footprint and function. We believe this does NOT constitute a "significant change" in the design of the facility. Requesting approval for that swap out.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
