SAFETY SETBACK INFORMATION

Required for change of Surface Location.

Distance from Well to nearest:

Building: _____ Feet
Building Unit: _____ Feet
Public Road: _____ Feet
Above Ground Utility: _____ Feet
Railroad: _____ Feet
Property Line: _____ Feet

INSTRUCTIONS:

- Specify all distances per Rule 308.b.(1).
- Enter 5280 for distance greater than 1 mile.
- Building - nearest building of any type. If nearest Building is a Building Unit, enter same distance for both.
- Building Unit – as defined in 100 Series Rules.

SUBSURFACE MINERAL SETBACKS

Required for change of Top and/or Base of Productive Zone. Enter 5280 for distance greater than 1 mile.

Is this Well within a unit? _____

If YES:

Enter the minimum distance from the Completed Zone of this Well to the Unit Boundary: _____ Feet

Enter the minimum distance from the Completed Zone of this Well to the Completed Zone of an offset Well within the same unit permitted or completed in the same formation: _____ Feet

If NO:

Enter the minimum distance from the Completed Zone of this Well to the Lease Line of the described lease: _____ Feet

Enter the minimum distance from the Completed Zone of this Well to the Completed Zone of an offset Well producing from the same lease and permitted or completed in the same formation: _____ Feet

General Comments

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Reclamation Specialist	<p>Information and data provided (such as findings or figures) is inconsistent between the three (3) Bird Survey reports Operator has submitted to the ECMC. Additionally, the methodology does not appear to be "best survey practices" for locating nesting bird species.</p> <p>Below is an example of one inconsistency regarding the Operator's findings observed within the report:</p> <p>-Survey Observations within the May 2024 Sundry submittal states that during the May 2023 surveys "No raptors observed within 0.5 miles of Location. Walked the entire Duncan Facility, no nesting MBTA in disturbance area. One unoccupied, small cup like nest in gamble oak north of Location". During the July 2023 surveys it is stated that "No raptors observed within 0.5 miles of Location. no nesting MBTA in disturbance area. Could not locate small cup like nest north of Location".</p> <p>-However, the Survey Observations submitted within this Form 4 state that during the May 2023 surveys "No raptors observed within 0.5 miles of Location. Walked the transect for entire disturbance area, no nesting MBTA in disturbance area. One inactive-unoccupied, small medium stick nest in gamble oak within area of disturbance". During the July 2023 surveys it is stated that "No raptors observed within 0.5 miles of Location. Walked the transect for entire disturbance area, no nesting MBTA in disturbance area. One inactive-unoccupied, small-medium stick nest in gamble oak within area of disturbance" for the July 2023 observations. Within this resubmittal, the Survey observations and findings have been changed and now indicate that a nest WAS observed, where previous submittals state that a nest was NOT observed within the disturbance area.</p> <p>Due to these details, and other discrepancies within the Report, it is unclear whether or not information being provided by the Operator is accurate and complete pursuant to Rule 207 requirements. Therefore this Sundry is also being denied, and no additional re-submittals will be requested</p>	07/29/2024
Reclamation Specialist	<p>Sundry #403847985 was denied due to insufficient details regarding methods of how the Migratory Bird surveys were performed. Operator was directed to submit a New Form 4 with survey methodology, all photo documentation, and Lat/Long information for nests what were discovered. This Sundry has been submitted in response to this requirement.</p>	07/29/2024
