**General Comment:**

On 07/23/2024, ECMC Staff conducted a field inspection in response to a reclamation complaint at the Kerr McGee Oil & Gas Onshore LP (#47120) - Callen USX Tank Battery (Location ID #306751) . Refer to the "Complaint" and "Reclamation" Section of this Field Inspection Report for additional information.

**Complaint**

Comment: **Complaint: #403865215**  
**Field Inspector Assigned: Dylan Edwardson**  
**Location ID: #306751**  
**Well API: #123-25194**  
**Inspection Document: #708201430**  
**Nature of complaint: Complainant had concerns that three (3) meter sheds initially owned and installed by Kerr-Mcgee Gathering LLC remain on site after the respective wells were plugged and abandoned. The meter sheds are preventing the land from being reclaimed and put back into crop production. The complainant also explained that the land is overgrown with weeds and is not being maintained. ECMC Staff attempted to contact the complainant via telephone on 07/25/2024 to schedule an onsite visit; Staff was unable to get a hold of the complainant and left a message.**

Corrective Action: **Refer to "Reclamation" Section for additional information.**

Comment:

This location does not comply with Rule 1004. In response to a reclamation complaint, Staff observed that three meter sheds (two Kerr McGee, one PDC) and associated piping remain at the former tank battery location. All surface equipment should have been removed within three (3) months of the last well's plugging date (123-25194; PA 07/29/2023) which should have been completed by 10/29/2023. Additionally, the former access road and well location have evidence of undesirable vegetation, consisting primarily of kochia. Additional reclamation activities are required. Refer to attached inspection photos.

Corrective Action:

Remove all surface equipment and perform reclamation in accordance with Rule 1004.
