RE: Final Approval Mayberry #3, Disposal Application  
SE NW Sec. 10 - T34S - R41W 6th P.M.  
Baca County, Colorado

Dear Sir,

The Commission has reviewed your application to re-complete the Mayberry #3 as a disposal well in the Red Cave formation and has found it acceptable. This letter serves as final approval of the disposal application dated August 24, 1992.

Maximum authorized surface injection pressure has been set at 161 psig. If higher pressures are required please contact the Commission for further requirements.

Submit OGCC Form 14A (Monthly Report of Fluids Injected) by the 25th of the month following the month covered by the report. The following information should help you in the filing of this report. If State lease numbers or codes are needed to complete this form please contact Marsha Choury of this office.

<u>Facility No.:</u> 336	<u>Field:</u> Greenwood
<u>Well Name:</u> Mayberry #3	<u>API No.:</u> 009-06379-1

<u>Currently Approved Source Leases:</u>	
<u>COGCC Lease No.:</u>	<u>Lease Name:</u>
08417	Mayberry 1

If additional produced water source leases are anticipated, approval must be obtained from the Commission prior to their injection into the disposal well. The request should be submitted on OGCC Form 4 (Sundry Notice) and specify the OGCC lease number, if one has been assigned, lease name, operator, location, and producing formation. Additional water analyses may be required if water is obtained from other producing horizons or if the distance between new sources is determined to be significant from those analyses already submitted.

If you have any questions on this approval, please do not hesitate to call me at 894-2100.

Very truly yours,

*Ed DiMatteo*
