Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

KPK was performing P&A operations on 10/24/2022 for the Koch 41-6 wellhead and associated flowline when PID field screening and analytical results indicated the presence of organics at sample location SS-6@5'. The sample location was excavated to 7' depth on 10/31/2022 and tested clean both on the PID and the laboratory analytical results. The excavation has been backfilled. This Form 19 submittal has been required by the ECMC.

Impacted Media (Check all that apply) ☒ Soil ☐ Groundwater ☐ Surface Water ☐ Dry Drainage Feature

Surface Area Impacted: Length of Impact (feet): 10 Width of Impact (feet): 3

Depth of Impact (feet BGS): 7 Depth of Impact (inches BGS): _____

How was extent determined?

Extent of impacts was determined utilizing excavation, impacts were discovered when field screening showed high PID readings at the SS-6@5' soil sample location. Analytical results indicated elevated levels of hydrocarbons at SS-6@5' location. The impacted soils were then removed through excavation and re-sampled at 7' depth bgs and confirmed that no organic exceedance remained.
See attached tables and figures.

REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

- Basis for Closure:
- ☐ Corrective Actions Completed (documentation attached, check all that apply)
 - ☐ Horizontal and Vertical extents of impacts have been delineated.
 - ☐ Documentation of compliance with Table 915-1 is attached.
 - ☐ All E&P Waste has been properly treated or disposed.
 - ☐ Work proceeding under an approved Form 27 (Rule 912.c).

Form 27 Remediation Project No: _____
 - ☒ SUSPECTED Spill/Release did not occur or was below Rule 912.a.(5) reporting thresholds.

OPERATOR COMMENTS:

The volume of this release is below reporting thresholds. KPK excavated and resampled the location to confirm that soil impacts were removed. The total excavated area was approximately 8 cubic yards. Impacted soil volume did not exceed the 10 cubic yard threshold. Confirmation sampling results were below Table 915-1 concentrations for protection of groundwater and or below site specific background levels. KPK respectfully requests no further action at this location.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
