COMMENTS:

This notice of the continued combusting of casinghead gas from the State of Colorado C#5 is being made as a result of Anadarko/Western Midstream shutting down their Third Creek Gas Gathering System in May of 2018 which was the gas sales outlet for the well. No new gas sales alternatives have yet to be implemented to date for this de minimus amount of gas. Discussion of those alternatives can be found outlined in the attached gas capture plan.
It is estimated that 2 1/2 MCFD from the well is being combusted within a 98% efficient combustion devise.
No detectable H2S concentration is found in the gas. A lease gas analysis is attached.
The Colorado State Land Board is receiving royalty on the value of gas being combusted.
The APCD permit number for the combusted gas is 21AD0410.

Operator Comments:

This Form 4 for the State of Colorado C#5 is being filed to maintain communication with the COGCC regarding casinghead gas combustion at this lease's production facility and implication of the recent Mission Change rulemaking by the COGCC pursuant to Rule 903.d.(3). Renegade believes that it is compliant with all rules governing venting and flaring of natural gas (Rule 903) and this Form 4 is being filed as a courtesy. The revised rule does not accurately contemplate situations like the Third Creek Gas Gathering shut down. Combusting of this produced casinghead gas is not routine, is necessary to produce the oil reserves and therefore cannot be considered a "waste".

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
