**COMMENTS:**

This well had a bradenhead test conducted 06/14/2024 (Form 17 doc# 403828134) reported 660 psi. After diagnostics were conducted on this well's bradenhead, it was determined that the pressure requires mitigation. Crestone will implement a mitigation plan where the Bradenhead is tied into the facility to drawdown the Bradenhead pressure for 6 months. At the conclusion of 6 months Crestone will compile pressure and test data, draw conclusions on the success of the mitigation, and determine future plans.
