COMMENTS:

This well surpassed the action threshold in June 2024. A bradenhead test conducted 06/14/2024 (Form 17 doc# 403828174) reported 1805 psi. Crestone has not seen the Bradenhead pressure return to a level above the notification threshold since the blowdown during the bradenhead test. This can be seen in the attached pressure chart and is verified by a passing bradenhead test on 08/05/2024 (Form 17 doc# 403880404) reporting 0 psi. For these reasons, Crestone does not believe further mitigation is required and requests that this well be returned to monthly monitoring and annual testing.
