General Comment:

On 8/9/2024, Reclamation Specialist Trujillo conducted an interim reclamation and stormwater inspection at TEP Rocky Mountain LLC's CSF-67S91W/8SESW Location in Garfield County, Colorado.

Location is Fed Surface / Fed Minerals.

This inspection is a follow-up to #696205754 to document compliance with the following corrective actions:

- Stormwater
- Loadlines missing cap/plug
- Tank Battery Signage
- Weeds

It was observed in this inspection that corrective actions remain outstanding.

Refer to the "Location" and "Reclamation" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspection that have not been addressed are still applicable.

Comment

Inspection #696205754 observed Noxious weeds (Common mullein) established on the interim slopes of the Location. Inspection required Operator to comply with Rule 1003.f and Rule 606.c.

Though no Resolution has been submitted as required by Rule 210.b, weeds observed appeared to have been previously sprayed; any remaining individual mullein plants that were not sprayed were removed by reclamation specialist.

This CA is being considered resolved at this time. Continue to monitor and manage weeds on the Location.

Comment: [See "COGCC Comments" at the end of this report.](#)Corrective Action: **CA Per Inspection #696205754:**

Comply with Rule 1002.f- install or repair required stormwater and erosion control measures to manage runoff from the pad in a manner that minimizes erosion, degradation and sediment transport. Ensure BMPs are installed per good engineering practice, and maintained in a proper functioning condition.

Date: _____

Pits: ☐ NO SURFACE INDICATION OF PIT**ECMC Comments**

Comment	User	Date
<p>Inspection #696205754 observed that stormwater and erosion control BMPs to manage runoff from the working pad surface are missing or insufficient; runoff from the pad is resulting in sediment deposition and degradation to the interim areas on the east and northern ends of the Location. Ditch along the western perimeter appears to discharge directly into the interim areas, and travel straight down the slope; BMPs in conjunction with the ditch to interrupt velocity or to allow sediment fallout prior to off-site stormwater discharge not apparent. Inspection required Operator to comply with Rule 1002.f.</p> <p>It was observed in this inspection that corrective actions to comply with Rule 1002.f have not been taken; BMPs to manage runoff from the working pad surface remain missing or insufficient.</p> <p>This CA has not been addressed and remains applicable.</p>	trujilloam	08/14/2024
